

# Holiday GIFT GUIDE

## The Sportz X-Treme Pac

The Sportz X-Treme PAC is one of a kind camping package designed with everything you need for a comfortable stay in the great outdoors. The PAC includes a 2-person tent, full rain fly, two "Thermolite" mummy style sleeping bags, two folding stools and a carrying bag. All items pack conveniently into a heavy-duty bag that features adjustable straps that attach to any rack or pack and weighs less than 19lbs.

Features of the X-Treme PAC tent includes: two large side doors, eight large no-see-um mesh windows for superb ventilation, full rain fly and color-coded fiberglass tent poles for quick and easy assembly. The Sportz X-Treme PAC allows you to easily take it anywhere you go, a necessity for today's outdoor enthusiasts. Ideal for motorcycling, ATVing, and horseback riding. Tent size: 7.5'L x 6.5'W x 48"H. PAC size: 22"L x 12"W x 11"H.

For more information call Napier Enterprises (800) 567-2434 or visit [www.sportzbynapier.com](http://www.sportzbynapier.com).

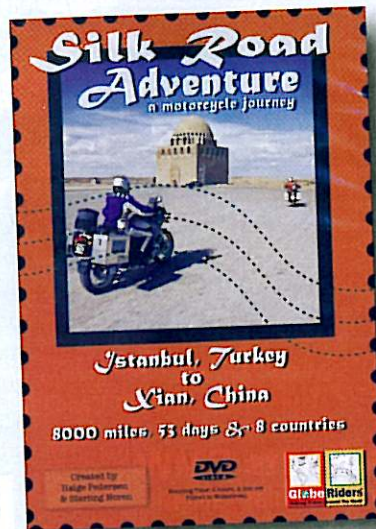

## Silk Road Adventure: a Motorcycle Journey

If you're interested in traveling the Silk Road and want to know more about what's along the way or if you have before and you want to take a ride down memory lane, this DVD is for you!

Created by Helge Pedersen and Sterling Noren, follow the Globe Riders as they ride from Istanbul, Turkey to Xian, China. The entire trip is 8,000 miles, 53 days and covers 8 countries.

This four-hour DVD is reminiscent of a Discovery Channel documentary, and features much more about the cities in which the riders stop along the way than actual riding footage. Still, you can get a feel for the difficulties they face including mechanical breakdowns, accidents and traffic of the bustling cities.

To purchase the Globe Riders Silk Road DVD for \$39.95, access [www.globeriders.com](http://www.globeriders.com).

## New GPS Mounting System

TechMount Accessory Mounting Systems has introduced its new GPS mount for the BMW K1200GT. It provides a secure, central-mounting handlebar location that positions a GPS for easy visibility. (A satellite radio, video recorder, cell-phone, PDA, toll-transponder, etc. can also be mounted with the appropriate optional mounting plate.)

The TechMount unit won't interfere with the GT's adjustable handlebars; it remains in a fixed position regardless of the handlebar adjustment. CNC-machined from 6061 Aluminum billet, then anodized to protect it from the elements, it beautifully matches the bike's fit and finish. Simple installation with the tools provided.

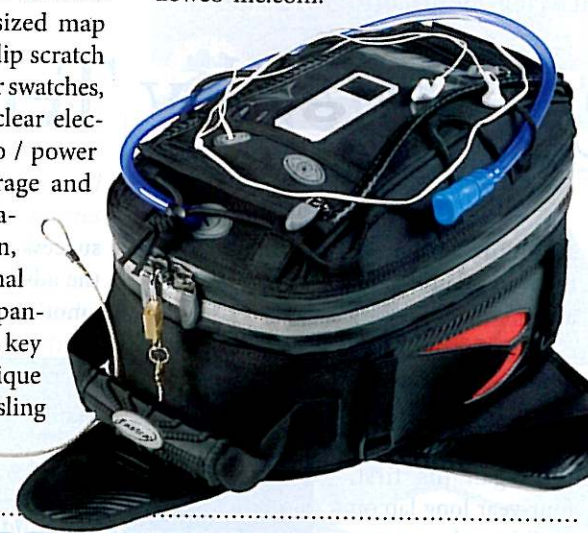

The new mounting system is also compatible with all TechMount accessories. Suggested retail: \$89.95. Visit [www.techmounts.com](http://www.techmounts.com) for details and dealer locator, or call 866-341-4192.

## Fastrax Sport and Adventure Tank Bag

The ultimate in versatility and style designed for Sport and Adventure Bikes (will fit many other bikes). Built from rugged 1680 denier polyester with carbon fiber vinyl accents, this tank bag features waterproof zippers, lockable molded zipper pulls, removable full sized map panel, reflective material, no-slip scratch resistant padded base, nine color swatches, attached sewn-in rain hood, clear electronics storage area with audio / power ports, hydration bladder storage and access port (bladder sold separately), four inches of expansion, internal storage pockets, external storage area with draw-tight expansion, padded attachment straps, key fob, lockable security cable, unique molded handles and backpack sling for convenient carrying.

The Fastrax Tank Bag utilizes magnets and optional straps to fit all motorcycle tanks. Limited Lifetime Warranty. MSRP \$129.99.

For more information, visit [www.dowco-inc.com](http://www.dowco-inc.com).

## Condor Pit Stop Chock

Most people prefer riding their motorcycles to trailering them, especially BMW owners. But sometimes you have to haul your bike to the dealership, or to a track day, or drive it in January to the warm weather place for your vacation ride. So why invest in a high quality wheel chock if you'll only use it a few times each year? Because the Condor Pit Stop / Trailer Stop is the only wheel chock that you can use 365 days a year.

Condor's patented adjustable cradle will hold virtually any size tire and wheel combination, front or back, in a secure upright position, so that it requires only one person to load and unload the bike for trailering, and it secures with only two tie-down straps. And you don't have to over-tighten those straps, which can cause damage to sensitive suspension components like springs or fork seals.

And best of all, you can use the Condor Pit Stop / Trailer Stop every day in your garage to keep your bike secure and upright for maintenance chores, checking fluids, to wash and detail the bike, or just to save space in your garage.

The Condor Pit Stop / Trailer Stop sells for \$235 + Shipping. To view a demonstration video and see all their products, visit their Web site at [www.condor-lift.com](http://www.condor-lift.com) or call 800-461-1344.
