

INSTRUCTIONS FOR THE INSTALLATION OF GUARDIAN® CUSTOM BIKE INDOOR COVER

Congratulations on your purchase of a GUARDIAN® custom bike indoor cover. Properly cared for, your cover will last for many years of service. The GUARDIAN® custom bike cover is manufactured from 100% cotton fabric and is intended for indoor storage only. Your cover also contains an elastic shock cord that is sewn into the hem. This feature keeps the cover tight around the wheels. The following information should be used to ensure maximum longevity.

Note: All GUARDIAN® custom bike covers are sized to fit specific motorcycles. It is very important that you have the correct one for your application. If you are uncertain that your GUARDIAN® custom bike cover is correct, please contact your dealer or DOWCO Inc. to verify your fit before attempting first-time use.

Note: *This cover is not designed for covering your motorcycle while it is outdoors, being trailered or in the back of a pick-up truck.*

WARNING

This cover must be completely removed prior to starting or operating the vehicle. Failure to do so could result in serious injury and/or property damage.

Installation

Read instructions before using.

Unfold cover. Locate "BACK" tag.

Starting in the front wheel area, pull down over the windshield and "tuck" the elastic hem under the centerline of the wheel.

Working toward the rear of the motorcycle, slide the cover down the sides, avoiding "snag" points. The cover should be long enough to allow the elastic hem to fully wrap below the centerline of the rear wheel and have a tight fit along the perimeter. Care should also be taken to avoid placing the material against hot engine components, as burning or melting may occur.

Caution: Mirrors, muffler ends, shifters, brakes and foot pegs are common wear points. Do not allow fabric to "snag" around them. Antennas are capable of puncturing the cover – use extreme care.

Important

Wait for the motorcycle to cool-down before installing the cover. This will greatly increase the life of your cover. Grommet patches are provided to enable you to secure the cover under the motorcycle.

Care and Cleaning

Your cover requires very little maintenance. Normal dirt and grime should be brushed off with a soft terry cloth or removed with warm water and a mild detergent using a sponge or terry cloth. The cover should be thoroughly dried before using.

Caution: Do not place in washing machine and do not wring or twist the cover to remove moisture.

Important

Failure to comply with the above directions may reduce the life of your cover. If you have any questions or comments, please contact either your dealer or DOWCO Inc.
